PREFACE

A REQUEST in 1895 from some members of the Board of Trustees and the Faculty and many of the Alumni induced the undersigned to begin the collecting of material for the publication of a Register of the Officers and Students of the University similar to the one prepared by Professors Wyman and McCorvey, in 1878, of the Officers and Graduates with Titled Degrees. In the present book the names not only of those who have received degrees, but of every duly matriculated student from 1831 to 1901, inclusive, are given. From the Register of 1878 and the publication of names elsewhere the list of Graduates with Titled Degrees was easily obtained, but the difficulty of establishing an accurate roll of those students who did not receive degrees has been found to be far beyond what had been anticipated. No catalogues for some of the earlier years were published at all and no copy of the printed catalogue for the year 1849 has been preserved. The roll of students in most of the catalogues that are on file was found to be very inaccurate both in spelling and omission of names. Consequently a long search had to be made through the old Registration and Minute Books. Here unexpected difficulties were encountered. The writing in the first Registration Book, from 1831 to 1837, has become dim with age and illegible in many places; the Registration Book from 1870 to 1886 could not be found, and some of the others were poorly and inaccurately kept. Occasionally applicants for admission who were not admitted had signed their names in the Matriculation Book. No record was made of this fact and their names were published in the annual Catalogue. I have gone over the entire roll five or six times, comparing and checking it with information from every obtainable source, throwing out such as were proved not to be matriculates, and in a few cases inserting some where the evidence was unmistakable that they were students though their names did not appear upon any of the records. It is believed now that the list is fairly accurate, though some names may have been rejected that should have been retained, and *vice versa,* and it is possible that a few may have been overlooked altogether.

In 1897 Mr. J. H. Johnson (U. of A., 1881), Superintendent

of the Deaf and Blind Institute at Talladega, with the aid of the pupils of the institute, published, free of cost, a list of the matriculates of this University from 1870 to 1897. The distribution of this pamphlet created much interest in the compilation of the present Register, and led to the correction of many errors and the insertion of omitted names and, indirectly, to the discovery of many other important facts.

It was soon recognized that a compilation of this kind would require much labor in its preparation, and I felt justified in going a little farther than Professors Wyman and McCorvey in 1878 in the collection of additional data that would be interesting and specially useful to any one who may wish hereafter to prepare a fuller sketch of any students. Besides the original and last residence, vocation, positions held in army, State or church, authorship of publications, membership in learned societies, there have been added date of admission, name of father, maiden name of mother, date of birth; if married, the maiden name of wife, and if deceased, the exact date of death.

In order to economize space and at the same time to bring out prominently the most important facts that are generally desired, the full name, degree or class at this University, vocation and the present or last address are printed in large type in one line. Below this are given in small type, in the following order, date of admission, home address while a student, name of father, maiden name of mother, date of birth, degrees from or attendance at other institutions, official stations in chronological order; if married, maiden name of wife, and finally, if deceased, date of death. Part II, therefore, is really a brief biographical dictionary of the matriculates of this University.

An earnest effort was made to get these facts directly from the parties themselves or their representatives, but for the want of proper addresses and the indifference of many, the task has been most difficult. Whenever it was impossible to get the facts immediately from the parties themselves or their representatives, I have taken freely the data as found in the Register of 1878, Brewer's Alabama, Garrett's Public Men in Alabama, Saunder's Early Settlers in Alabama, various fraternity catalogues, general catalogues or registers of other institutions and other works of reference and in the columns of various daily and weekly newspapers of the State.

The main feature of the work being the compilation of the record of the students, the names only of the officers and their time of service and the names of recipients of honorary degrees and dates of the degrees are given.

Mr. Alto Velo Lee, Jr., Fellow and Graduate Student, 1898-99, and Mr. William Hubbard White, Fellow and Graduate Student, 1899-1900, assisted me in compiling and revising the lists of names. During the summer vacation of 1900, Mr. Griffin Lamkin, private secretary of the President, assisted in correspondence and in the recording of statistics of Part II. Miss Helen Jones has made a large part of the final typewritten copy for the press. To these helpers I extend my thanks for their hearty coöperation, interest and zeal in the work.

With much pleasure do I acknowledge my indebtedness and thanks to Dr. William S. Wyman for his assistance. From the beginning to the end he has ever taken a deep interest in the progress of the work. His long connection with the University and his remarkable memory of names and family relationships in Alabama enabled him to give me many facts, and, but for valuable clues and suggestions constantly furnished by him, the facts concerning hundreds of the older students especially would probably not have been found.

I also sincerely thank the many Alumni and other friends everywhere who have so kindly and diligently exerted themselves in gathering information about former students. Without this generous aid a full record could not have been compiled. It would have given me great pleasure to publish a list of the names of all who have helped me in this way, but the number of these is so great that the publication of their names would far exceed the necessary limitations of this Preface.

Much to my regret I have not been able to insert in this Register the names of the students of the Medical Department at Mobile. The records of this department were not kept at the University. It was impossible, for want of time, to secure accurate and complete information touching the students of this department. I cherish the hope that in any future edition of this Register the names of all students in all departments, together with the interesting information concerning their careers, may be printed.

In every work of this kind, necessarily, some errors and omis-

sions will occur, originating in part from the careless statements of some correspondents and the treacherous memories of others, in part also from the inevitable fallibility of a compiler working without collaborators. It is hoped that these will be pardoned by the indulgent reader. In some cases, little or no information has been obtained, either because it was impossible to find a clue, or because the parties themselves or their representatives neglected or refused to furnish the necessary information. All corrections should be sent to me or to the President of the University at once. They will be preserved for the next edition of this Register or for early publication in the University Bulletin.

POST SCRIPT.

It was intended to close this Register with the session of 1900-01, but the completion of the publication having been delayed until after the opening of the next scholastic year, the names of those who matriculated in September and October 1901, are given in Part II under the date of 1902. The Alphabetical Index of Part III having been printed before this, these new names could not be inserted in that Index, nor is the number for 1902 included in the total attendance and enumeration given on page 504.

A Geographical Index of students now living whose addresses were obtained is also added to Part III. It is believed that this will prove a great convenience in helping one to ascertain quickly the names of students who are now residing in a certain locality.

PART II

Record of Students of the University

Note of Explanation

THE names are given according to the year of withdrawal, (1) the Graduates with Titled Degrees, (2) the Graduates in Schools and Non-Graduates who left during or at the close of the College year. From 1831 to 1846 the College year began in January and closed in December. Since 1846 it has begun in September or October and closed in June, July or August. Hence a student leaving in November, 1850, would be placed under the year 1851. Part III is an alphabetical Index to names of Part II.

As it is impossible to get from the records even an approximately correct list of the Graduates in Schools no attempt is made to distinguish between them and the Non-Graduates.

The full name (when obtainable), Degrees obtained at this University or Class at the time of withdrawal, vocation and present address for the living or last address for the deceased are printed uniformly in large type in one line. Below the name in small type is given the date of matriculation and home address while a student, followed by other historical data.

The only exceptions to this order are for several names in 1865 and a few in other years where nothing could be found except the name and the date of admission. In all such cases the date of admission is printed in same line with the name.

When no state is given after a postoffice or county, Alabama is understood.

Abbreviations

Most of the abbreviations used will be readily understood from the context. The following are explained:—b. born; d. died; dau. daughter of; m. married; s. son of; * deceased.

After each name in large type the following indicate the College Class at time of withdrawal: (Sen.) Senior; (Jun.) Junior;

(Soph.) Sophomore; (Fr.) Freshman; (Ec.) Eclectic Course; (Spec.) Special Course; (Prep.) Preparatory; (Law) Undergraduate in Law Course.

It should be noted that for the years 1860 to 1880 there were no divisions into classes because the University was under the elective system.

NAMES REPEATED

When students obtained more than one Degree *in course* or withdrew from the Academic Department and afterwards entered the Law School the name is repeated for each Degree or Department, but the record is given only once. Young women students who have since married are given both by their maiden and married names.

Geographical Index of Living Students

The following index contains the names of all living students whose addresses have been ascertained, arranged in geographical order. Those from Alabama are given by counties and all others by states and countries. In each sub-division are two lists, I and II. I are Graduates with Titled Degrees. II are Graduates in Schools and Non-Graduates. The number after each name indicates the year under which it may be found in Part II, where the full address and other facts are given.

The following is a list of the states and countries represented:

Honorary Degrees

A strenuous effort was made to perfect this list, but it is highly probable some names have been omitted. In many cases the names were not published in the annual catalogues, and some of the original records of the Trustees have been mislaid and cannot now be found.

THE SOCIETY OF ALUMNI

This Society was organized a few years after the opening of the University and was chartered by the State Legislature. Only Graduates with Titled Degrees were allowed to become members. This continued to be the case until the reorganization after the Civil War, when membership was extended to Honorary Graduates and Graduates in Schools. In 1883 the by-laws were again amended so that all students who left the University to enter the Confederate Army and those who were in attendance when the buildings were destroyed in 1865 were invited to unite with the Society. In 1896 a new charter was obtained from the Legislature and a new constitution was adopted. All former students who were in attendance at least three months and received an honorable discharge can now become members by applying to the Secretary of the Society and paying the annual dues of one dollar. Any member can become a Life Member by paying twenty dollars, and shall not be subject to annual dues.

In 1886 an Alumni Fund was established for the purpose of aiding meritorious young men who are unable to meet the expenses of a college course. To this fund are added the net receipts of annual dues and Life Membership fees. Every year some students have been enabled to continue at college by borrowing small amounts from this fund.
